BIO

Originally formed in 1994, the band Harvest Moon plays a variety of music and covers a number of artists including Neil Young (hence the name Harvest Moon), Blue Rodeo, The Eagles, The Band and The Tragically Hip.

This four-piece band's repertoire generally adheres to a genre of music described as "grass roots classic rock". The songs are performed at a high level of quality utilizing tasteful three-part vocal harmony, acoustic and electric guitars, harmonica, banjo, mandolin, bass, drums and the sweet sound of pedal steel guitar.

The show takes the audience on a journey from the Woodstock era up to the modern day music of The Tragically Hip. From heartfelt Blue Rodeo ballads to rockin' out with the original father of 'Grunge Rock' Neil Young.

Truly...a unique musical experience.
